

## Primary Robotics and Technology Club

27<sup>th</sup> of January, 2017

Dear Parents/Guardians,

Primary students interested in robotics and technologies are invited to participate in *Primary Robotics and Technology Club*, which will run every Wednesday from the 15<sup>th</sup> of February until the end of the Term 4 during lunch hours.

This fantastic opportunity will give students insight into the foundations of robotics and future technologies. Students at times will be required to work in teams in order to critique, design, make and program their own robots to solve a varying degree of established challenges.

The club offers students an insight into the world of programming and engineering systems, which will carry across into their senior academic education.

In addition to the above students examine real world technological problems, technological philosophy and computing technology.

If you have any queries about any of the above please do not hesitate to contact me.

Ryan McFly  
Primary Robotics Co-ordinator

Christine Clark  
Principal
